

ABSTRACT OF THE DISCLOSURE

A vehicle inner belt molding to be fitted along an interior of an opening edge of an elevating window in a vehicle. The vehicle has a door inner panel and a trim board being attached to the door inner panel and having a downward flange portion protruding therefrom. The vehicle inner belt molding includes a fitting portion to be attached to the door inner panel, and a sealing lip formed integrally with an exterior side of the fitting portion to be in elastic contact with an inner surface of the elevating window. The fitting portion has an upward opening groove fittable with the downward flange portion.
